One day, 400,000 coins were sold. Our coin price plummeted. So I bought 400,000 coins at once on the market. And then I raised the price. When BTD coin was listed, American traders and I continued to buy coins to create global trading volume and price increase. And I sold at the highest price and made a lot of money. And with the money I earned, I bought a lot of Bitcoin, and now that Bitcoin is rising, my money continues to increase without me doing anything. I can make everything about my coin, including the price increase and trading volume, the world's number one coin again whenever I want. I have already proven my ability to users all over the world. Whenever the time comes to use my ability again, I will do it without hesitation. If you talk nonsense even after seeing it with your own eyes, leave my band.

## [ Bitcoin Dollar TARGET GOAL \$70,000 ]

Bitcoin Group announced its listing roadmap that Bitcoin Dollar, its Bitcoin automatic mining app system, would start trading services for a target of \$70,000 in 2025.

President Song Myung-ho, an American developer of Bitcoin Group, invented Bitcoin Dollar, which anyone can mine easily with the goal of creating a second Bitcoin that surpasses Bitcoin.

Bitcoin Dollar is a new Bitcoin-based block chain through real life use and a cryptocurrency personal mining system.

For free mining coins of other companies such as PicoCoin(PiNetwork), it is troublesome to access the app every day, press the mining button, mine every day, and watch advertisements. It is captivating users all over the world with a system that by mining automatically.

Bitcoin Dollar's ultimate goal is 70,000 USD, which is very different from other systems that have been introduced so far in all aspects such as technology, remittance, convenience, and business feasibility. We are confident that we will achieve it and surprise the world.

The Bitcoin group has attracted more than 1,000,000 users worldwide so far, and is rapidly growing in China and Indonesia, Europe, Arab, Africa. Bitcoin Dollar is playing the role of an evangelist.

This is the reason why the interest of the global blockchain cryptocurrency industry is focused on Bitcoin Dollar's unstoppable moves.

The Bitcoin Dollar announced by the Bitcoin Group will be explained in detail from now on.

## **First. Let me tell you in detail what Bitcoin Dollar is.**

President Song Myung-ho, an American developer of Bitcoin Group, invented a block chain cryptocurrency with a goal of creating a second Bitcoin that surpasses Bitcoin, and this is Bitcoin Dollar.

It is famous as a system recognized by the world as that has applied for and registered worldwide patents. In particular, third-party free mining coins such as Pico coin have the hassle of accessing the app every day, pressing the mining button, mining every day, and watching advertisements.

Bitcoin Dollar is developed all the same as Bitcoin.

Total number of issuance one billion The conditions and system are the same for all 18.95 million coins mined so far, halving, Bitcoin-based blockchain, consensus algorithm, etc.

However, it perfectly compensates for excessive electricity consumption and remittance speed during mining through PC, which have been pointed out as disadvantages of Bitcoin, to ensure energy saving, fast remittance and the highest level of security, technology and convenience.

Bitcoin Dollar's target is 70,000 USD, and it will be listed on the world's top 10 global virtual asset exchanges from June to August, and it will be possible to sell, withdraw, and cash in your wallet.

Coins are provided free of charge through the current free airdrop event so that waiting until the goal is not bored, luxury bags, Genesis, Tesla, Apartments, etc. We are operating a trial service that provides both coins and gifts.

## **Second, We will tell you about the mining method of Bitcoin Dollar.**

Bitcoin Dollar is like Bitcoin. hash is a one-way encryption technology, so it is impossible to find the input value in reverse with the result value. Therefore, the only way is to run until the result is the same as the output value by brute force.

This processing of hashes per second is also called hashrate.

Solving the problem in this way solves the double-spending problem, as only the earliest mined blocks will be recognized and the rest will be discarded.

Therefore, Bitcoin Dollar is very strong in security and perfectly solved the slow remittance speed of Bitcoin by additionally applying an international patented algorithm using a personal network through a mobile phone and making it multi-system.

In other words, it blocks the factors that may cause unstable movements of cryptographic symbols, algorithms, and blocks in a small amount in advance.

Bitcoin Dollar uses a script algorithm instead of SHA 256, a complex hash algorithm, which is a device to prevent abnormal power consumption due to increased mining difficulty. have had The most notable achievement is the rapid creation of blocks. This is only possible with Bitcoin Dollar with the US patent technology of the Bitcoin group.

In the Bitcoin Hunter network, that is, each transaction is processed in a separate channel and only the result value is recorded in the block chain, and only important transaction details are stored in the block.

Other than that, transaction fees can be dramatically lowered by significantly improving network speed by processing other things outside of the block chain, and we are helping to make good use of it.

## **Third, we would like to inform you about the Bitcoin Dollar white paper.**

The white paper is for reference only. How many users will be able to understand all of them by writing down miscellaneous techniques that are difficult for even experts to understand and making a plausible and splendid white paper?

Bitcoin Dollar has already been officially recognized for its technology by the World Intellectual Property Office, and since you can directly see and feel the basic principles that are so easy when you use the wallet app, only the basic principles are written in the white paper, It is officially posted on the Bitcoin Dollar Website, so please refer to the website.

## **Fourth, we will tell you about the technology, security, and remittance speed verified by the world of Bitcoin Dollar.**

Bitcoin Dollar has been officially recognized for its technological prowess by patent offices around the world, including Korea, the United States, China, and / Japan, and boasts the world's highest level of security as publicly stated on TV that even world-class hackers could not break through the security.

It perfectly compensates for the slow remittance speed and has the advantage of the best fast remittance speed.

## **Fifth, we will tell you about the convenience of Bitcoin Dollar.**

Since Bitcoin Hunter was released as an integrated app and wallet, it will be easier to understand if you think of it as a multi-wallet with various functions.

The wallet app was created so that anyone in their 60s to 80s can easily install and use them. It has already been verified by 300,000 members worldwide, and those who use third-party coin wallets such as PicoIn(PiNetwork) will immediately feel how convenient and easy Bitcoin Dollar is when you install and use it.

**Sixthly, we would like to inform you that Bitcoin Dollar is an energy-saving, eco-friendly green coin.**

Through PC, which is currently appearing in other coins such as Bitcoin and Ethereum, the problem of excessive mining electricity usage was identified and improved, and power consumption was dramatically lowered to the level of cell phone electricity usage.

**Seventh, we will inform you about the perfect communication of Bitcoin Dollar.**

Bitcoin Group directly communicates with the foundation developers through SNS around the world, such as Band, Twitter, YouTube, Instagram, and Facebook, and you can hear answers to all your questions in real time 24 hours a day.

**Eighth, we will inform you about the price target of Bitcoin Dollar.**

Bitcoin Dollar's ultimate goal is 70,000 USD.

**Ninth, we would like to inform you about the public disclosure of the Bitcoin Dollar roadmap.**

Bitcoin Dollar was introduced to the world media such as the US and China, such as Yahoo Finance, from on 2025, free airdrops and auto-mining free beta services for users around the world such as Korea, the United States, China, Japan, etc. is.

And at the same time as the world's top 10 global virtual asset exchanges were unveiled in 2025, a total of 1 million additional airdrops were made to 10 million users on the exchange side, and the voyage toward the goal began in earnest.

When Bitcoin first appeared in the world, no one looked at it. Even if it was given away for free, no one was willing to accept it, saying it was a "scam".

In 2010, a programmer named Laszlo Hanyecz living in Florida, USA, mined and stored 14,000 bitcoins on his own computer. I posted that I would pay the equivalent of 10,000 coins in Bitcoin.

At the time, everyone did not see Laszlo Hanyecz' proposal as a 'scam', but after 4 days, someone delivered two pizzas to Laszlo Hanyecz on condition that he received 10,000 bitcoins, and Bitcoin was sent to the person who sent the pizza. 10,000 are transferred, and the first Bitcoin spot transaction is made.

Not everyone believed it was a 'scam', but he who sent two pizzas seized the once in a lifetime opportunity to earn \$569 million and become a millionaire.

We conclude today's news, hoping that you do not miss the one-time opportunity that has come to you in the name of "Bitcoin Dollar"

thank you.

## Bitcoin Dollar : Unlocking Treasure-Backed Wealth and a New Era of Crypto Mining

### 1. What is Bitcoin Dollar?

Bitcoin Dollar (BTD) is a cutting-edge cryptocurrency project that merges the power of blockchain. Designed with the same issuance structure and halving process as Bitcoin, Bitcoin Dollar adds a unique twist with its real-world treasure discovery vision, offering a bold opportunity for traders, investors, and crypto enthusiasts.

### 2. Built on Bitcoin's Proven Success

Bitcoin Dollar replicates Bitcoin's successful structure with similar issuance schedules, halving processes, and a finite supply.

### 3. Revolutionary Mining with an Automated App

Bitcoin Dollar introduces an innovative, stress-free mining experience through its sophisticated mining app, available on iOS and Android. With automatic mining and withdrawal into an inbuilt wallet, users no longer need to interact daily. Whether you're young, old, or new to crypto, Bitcoin Dollar's app ensures mining is accessible to everyone. VIP members can mine and withdraw 1.5\$BTD daily to bitmart exchange.

### 4. Halving Process for Long-Term Value Like Bitcoin

Bitcoin Dollar features a halving process where mining rewards are halved periodically. This process reduces the introduction of new BTD into circulation, increasing its scarcity and potential value over time, making Bitcoin Dollar a promising asset for long-term investors.

## 5. Community Participation and Reward Tiers

Bitcoin Dollar thrives on community engagement, with members advancing from ordinary membership to VIP status based on their participation in activities such as mining, contests, and promotions. Each level of involvement comes with valuable perks, with VIP members enjoying enhanced benefits, including daily mining rewards. Active participation in the community isn't just encouraged—it's rewarded with greater opportunities and higher levels of access.

**6.** A Serious and Legitimate Project with Global Patents Registered and patented in key global markets like the "USA, Japan, and Korea, Bitcoin Dollar stands as a serious and legitimate cryptocurrency project. This solid regulatory foundation offers enhanced security and trust for investors, traders, and community members, making Bitcoin Dollar a reliable and credible opportunity in the crypto space.

**7.** Trading and Liquidity on Major Exchanges' Bitcoin Dollar Coin (BTD) are easily accessible for trading on "BitMart" and other major exchanges.

**Don't miss out—become part of the next big crypto revolution with Bitcoin Dollar.**

**BITCOIN GROUP**
